

Methanol, Amines, and Glycols Guideline (MAGG) Project

Miles Tindal, Axiom Environmental Inc.
GL901351

Project Rationale:

To process chemicals detected in environmental soil samples. Currently no soil quality guidelines (SQGs) exist for some of these chemicals. AENV/PTAC/CAPP are collaborating in this project to develop SQGs for the chemicals.

Phase 1 (Sept 2004 – Feb 2005): Literature review and compilation, and identify data gaps

Phase 2 (Sept 2005 – July 2006): Additional toxicity testing

Phase 3 (Fall 2006): Develop guidelines
