

# **The Facilitation of Sustainable, Eco-efficient and Greenhouse Gas Technologies**

Kendall Dilling, Encana  
2004-04A

This innovative program is designed to increase the adoption of sustainable, eco-efficient and economical greenhouse gas reducing technologies in the hydrocarbon energy industry throughout western and northern Canada. PTAC will concentrate efforts to allow the hydrocarbon energy industry to reduce impacts on air, land, and water throughout industry operations such as exploration, processing, transportation and transmission. The association will facilitate access to technology, facilitate workshops, conferences, forums and technology information sessions, and provide neutral facilitation for collaborative research and development.
