

Create a Framework for Operator and Multi-Operator Water Management Plans to Satisfy the Policy Outcomes of the Water Conservation Policy for Upstream Oil and Gas Operations

Brent Bowerman, Baseline Water
17-WIPC-09b

The unconventional oil and gas sector view a MOWP as an opportunity to create a highly collaborative, participatory endeavor between industry and the AER and AEP to develop water management coordination recommendations and enhance public communication on water. The collaborative nature between industry and AER and AEP of both forming and operating a MOWP is emphasized.
