

# Assessing Peatland Restoration Success to Meet Alberta's Peatland Reclamation Criteria

Bin Xu, NAIT Boreal Research Institute  
GL 15-ERPC-11

Key deliverables of this project include:

1. operational scale demonstration sites of successfully restored well sites and linear feature to functional peatlands;
2. assessing the restoration success according to the upcoming peatland reclamation criteria and providing feedbacks for fine tuning of the criteria;
3. enabling SMEs and industry partners to meet the regulatory demands; and
4. the supply of highly qualified professionals specializing in peatland restoration.

## **Policy Issue**

Reclamation

## **Knowledge Gap**

flora and fauna use of (and response to) reclaimed habitats compared to pre-/un-disturbed habitats
