

Habitat Restoration

2018-2019

Algar Caribou Habitat Restoration Project

2016-2019

Efficient monitoring of wildlife responses to seismic line restoration in the Algar Habitat Restoration Program

2018

Influence of Forest Fires on Legacy Seismic Line Revegetation and on Caribou Habitat Restoration Treatment (e.g., Mounding and Planting) in Wetland and Transitional Habitats

2016

Does recovery linear features increase functional habitat for caribou?

2015

Efficient monitoring of wildlife responses to seismic line restoration in the Algar Habitat Restoration Program

Caribou Range Restoration Project Treatment Sites: 9 to 13 Year Follow-up Monitoring in the Little Smoky Caribou Range

Does recovering linear features increase functional habitat for caribou?

2013

Peatland Restoration of Abandoned Oil and Gas Well Sites

2009

Seismic Line Successional Recovery: Implications for Animal Movement and Weed Invasion in the Boreal Forest

2008

Development of Ecologically-based Criteria to Assess the Impact and Recovery of Seismic Lines

2003-2006

Woodland Caribou Research in Alberta – Caribou Range Restoration Project

2002

Recovery of Caribou Ranges in Alberta, Boreal & West Central
