

2001 Land Treatment of Bioremediate Hydrocarbon Contaminated Soils

Dr. Xiaomei Li, ARC

1. The overall goal of this project is to develop a best management practice to handle bioremediated hydrocarbon contaminated.
2. Select the best crop coverage on soils with hydrocarbon residues based on the crop yield.
3. Collect surface runoff from research plots and determine their toxicities using a simple bioassay.

2002 ARC_Phytoremediation to Enhance Hydrocarbon Remediation in Landfarms
