

Unsolicited Proposals

Some of the industry's most ground breaking innovations emerge from Small and Medium Enterprises (SME) and research sector, yet these organizations are often faced with significant barriers in bringing their ideas to market. We believe it is more important than ever to ensure that operators and producers are aware of potential research and innovative technologies that reduce costs and improve operational efficiency.

PTAC accepts Unsolicited Proposals that may address high priority environmental issues for the upstream oil and gas industry. PTAC will engage industry and government to review the proposal to solicit interest and provide feedback. If you would like to submit a proposal, please apply by filling out the [online form](#).
